

Website and online booking setup questionnaire

Please fill in every field that applies to your salon. We use this information to configure your website, calendar and booking system.

Fill this in directly in the document (click a grey field and type) and send it back to adjuststrategy@gmail.com. If you don't know something yet, leave it blank and we'll add it later — but opening hours, services and durations are essential before booking can go live.

IMPORTANT — never send us the password to your Google account, not in this document, not by email, not in a message. We don't need it. Calendar access is granted by an invitation from within Google Calendar itself, which takes you two clicks and can be revoked at any time. If anyone ever asks you for your account password, treat it as a warning sign.

Salon Gmail address	owner of the calendar
Does this account already exist?	YES / NO — if NO, we'll create it together
Email for booking notifications	every new booking arrives here
Should clients get a confirmation email?	YES / NO
Who else needs to see the calendar?	list Gmail addresses
Do you already use a booking platform?	e.g. SrediMe, Booksy — which one and which plan

4. Opening hours

Write times as 09:00 — 20:00. For a closed day write CLOSED. These hours appear on the site and decide which slots the system offers at all.

8. Services and durations

This is the most important section. Give durations in minutes and use real time, including washing and drying — this determines how many appointments the system offers per day. Cross out services you don't offer and add any that are missing. The price column is optional; tell us whether you want prices shown on the site.

12. What to send with this document

✓	Item
	Your logo, in the best quality you have (ideally .ai, .svg, .eps or .pdf)
	8–15 photos of the interior and your work, original size, not resized
	Photos of team members, if they want to appear
	Your current price list, in any form
	Access to your domain, if you already own one

Send photos via WeTransfer or Google Drive rather than as email attachments — email compresses them and they lose quality.
